DETAILED ACTION

Double Patenting

1. Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 15 (limitations of present claims 1, 4, 5, 6, 8, 9, 10, 12, and 13), 3 (present claims 2, 7), 6 (present claim 3), and 18 (limitations of present claim 11) of U.S. Patent No. 6,744,362. The claims in the U.S. Patent No. 6,744,362 recite all the claimed subject matter as claimed in claims 1-13 of the present invention, but still do not disclose the use of a first self-propelled mobile input/output bin. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the claimed invention of U.S. Patent No. 6,744,362 to choose the use of a first self-propelled mobile input/output bin or a consumable handling device for the purpose of detecting an out-of-service condition at a self-propelled mobile input/output bin or a consumable handling device.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).
